	/TANH Q. NGUYEN/ Primary Examiner, Art U	nit 2182	

Continuation of 11. does NOT place the application in condition for allowance because:

The information provided by applicant still cannot support the claim limitations - as indicated in the final office action. Applicant now considers apparatus to be FIG. 17 instead of ISOC 120; buffer to be both 1660 and 1700 instead of just 1660; ports of a peripheral device to be 140 and 100; peripheral device to be 80 instead of 20; controller to be 120; control data block to be 1680; plurality of fields to LCP# fields in FIG. 18; header portion to be WORD 0 of FIG. 18; identifier to be INDEX/CNT; control data block to be 1680; and one port being one of 100 inside 110 of FIG. 3. The claims are still not supported because the claims require the one port to be one port of the plurality of ports (i.e. one port of the plurality of ports of a peripheral device that generate indications of events), and there is no support for such requirement. The claims are also not supported because buffer 1700 is a buffer different from buffer 1660.

With respect to the art rejections of claims 17-20, applicant argues that Raasch is not concerned with or teach indications of events or a preset condition as in the claims. Raasch was not relied upon to teach indications of events or a preset condition, because the claims do not require such limitations. Raasch teaches a BIOS and transfer of interrupts (col. 4, lines 66-68; col. 5, lines 16-21). A BIOS would cause a computer to effect the functions of any apparatus (i.e. including the functions of applicant's apparatus), and a BIOS would cause a computer to effect the steps of any method (i.e. including the steps of applicant's methods).

In addition, applicant still has not provided the information requested by the examiner in the Response to Argumenst section (paragraph 14) in the final office action mailed July 9, 2008 - to help the examiner understand what applicant intends to claim. The examiner cannot determine allowable subject matter without understanding what applicant intends to claim.

TQN: October 17, 2008
